Innovative Office Products Announces Three POS Mounting Arms

Easton, Pa.—August 14, 2006—Innovative Office Products, Inc. (www.lcdarms.com), a designer and manufacturer of ergonomic mounting solutions for LCD monitors and keyboards, has introduced three point-of-sale (POS) mounting solutions, offering space saving, technology protection and image enhancement for retail environments.

POS monitors, kiosks and signature-capture devices can be mounted on Innovative's flexible arms, allowing sales staff and customers to adjust them in user-convenient positions. All POS products feature secure cable management to protect IT hardware investments, quick and easy installation, adjustable heights and angles to accommodate users of all sizes, and durable, retail-hardened products to withstand intense usage.

"Our attractive POS products offer retail-ready solutions so monitors, kiosks and signature-capture devices can be placed exactly where they are needed," said Bud Oddsen, president of Innovative Office Products. "Stores can save precious space while providing a better user experience for both their sales staff and customers."

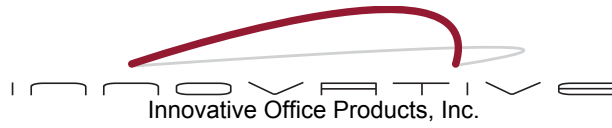

The POS products include:

- 9183 adjustable countertop mounts come in three telescope heights: 11-15 inches, 15-23 inches and 23-29 inches. Height is adjusted with an integrated knob on the mount's telescoping tube, and can be pivoted or turned to suit the user's needs.
- 9189 is an adjustable through-counter mount that also can be pivoted or turned to suit the user's needs. The mounting arm tube passes through the counter to provide a secure mount for displays. It comes in three sizes: adjustable from 7-12 inches, 7-24 inches and 7-36 inches.
- 9190 compact countertop mount is perfect for smaller work areas. This space-saving arm allows for quick adjustment of monitor tilt.

Demonstration units, photos and interviews are available.

About Innovative Office Products, Inc.

Innovative Office Products, Inc. is an Easton, Pa., manufacturer that designs and builds an industry-leading product line of mounting solutions for computer monitors and keyboards. Founded in 1986, the company produces innovative products and custom-designed solutions that serve the needs of such prominent customers as the New York

Stock Exchange, IBM, Lockheed Martin and NASA. Among many design awards received by the company is the 2006 red dot design award, and a silver medal by Business Week magazine's Best Product Designs Of The Year for 2002.
