Innovative Offers POS Monitor Solutions at 2008 KioskCom Self Service Expo

**Innovative Office Products will display 9190 and 9189 LCD screen arms,
offering flexible space-saving solutions for POS systems**

New York – October 15-16, 2008 – Innovative Office Products, Inc. (www.lcdarms.com), will feature its space-saving 9190 and 9189 model LCD mounting arms at the 2008 KioskCom Self Services Expo, October 15-16 at the Jacob K. Javits Convention Center. **Innovative will display its products at Booth 238.**

Both mounting arm models lift flat-screen monitors to offer flexible, space-saving solutions for point of sale (POS) systems. Many kiosks use unnecessary amounts of space by locking a screen in one position, making it more an obstacle or uncomfortable experience than a convenient service. Innovative's 9190 model and 9189 model LCD arms reduce a kiosk's footprint and provide a great range of motion for consumers.

"These POS solutions provide necessary functionality without consuming excess space," said Bud Oddsen, president of Innovative Office Products. "These mounts float POS devices in the air, allowing the user to effortlessly raise and lower the screen and enabling users of all sizes to achieve an optimal viewing angle."

The 9190 is an ergonomic, compact countertop mount for kiosks, signature capture screens and other POS devices. Securing a monitor safely to a counter, the mount is durable enough for retail environments, yet users can effortlessly pivot and turn it for easier viewing. The 9190 model also features:

- Quick set-up.
- Cable management system that allows cables to pass through the counter or behind the mount.
- Lock-in option.
- Support for monitors up to 25 pounds.
- Compatibility with VESA monitors.

Like the 9190 model, the 9189 is an ergonomic, compact countertop solution that reduces a kiosk or monitors' footprint. However, it also allows users to adjust the height of a monitor. It is available in three different ranges of height: 7-12 inches, 7-24 inches and 7-36 inches. This mount is secured by passing through a hole in the counter, allowing a retailer to bundle cables beneath the surface and out of view. The 9189 model also features:

- Quick set-up.
- Support for monitors up to 25 pounds.
- Smooth pivoting and turning.
- Lock-in option.
- Durable, retail-ready construction.
- Compatibility with VESA monitors

At Kiosk Com, Innovative will also be displaying its 7500 model flat panel radial arm and their EVO™ line of ergonomic LCD arms.

The 7500 Radial Arm weightlessly suspends a flat screen monitor about a desk or counter, freeing up valuable space and reducing clutter. Its range and flexibility features:

- 27-inch horizontal reach, and 18 inches of vertical range.
- Folds back to occupy just three inches of space.
- Can tilt a monitor up to 200 degrees.
- Manages cables and keeps them out of sight.
- Includes, FLEXmount™, a mounting kit that provides users with six different mounting options.
- Is compatible with VESA monitors.

The EVO™ line of ergonomic LCD arms are available in a variety of lengths, heights and mounting solutions, including slat-rail designs and desktop options. EVO™'s combination of attractive and intuitive design has made it an award-winning product. Like the 7500, EVO™ floats a monitor or laptop above a desk for an ergonomic set-up that can reduce workplace injuries. With EVO™, you can adjust a screen with one hand and tuck it out of the way while not in use. These arms are also available in Any Color You Like™ to match a variety of color schemes.
