EVO™ Laptop Arm Honored In Interior Design's Best of Year Competition

Elite of design community select EVO™ as among the best industrial design of 2007

Easton, PA—Dec. 6, 2007—Innovative Office Products, Inc. (www.lcdarms.com), a designer and manufacturer of ergonomic mounting solutions for LCD monitors, laptops and keyboards, is proud to announce that the EVO™ Laptop Arm has been selected for a Merit Award in *Interior Design* magazine's annual Best of Year design competition.

The honorees were announced on Nov. 30, when 700 of the design community's elite gathered at TimesCenter in New York City to recognize the best design of 2007. This marks the 4th design award received by the EVO™ Laptop Arm, which has come to be regarded as the leading solution in the notebook mounting category.

The EVO™ Laptop Arm is a floating docking station for notebooks and tablet PCs. The arm allows the user to create an ergonomic computing station at his or her primary desk, without having to sacrifice the mobility of the computer. A gas spring arm "floats" the computer above the desk for comfortable viewing, with quick attach and release for work on the go. A full-size keyboard and mouse can be used to recapture the comfort of a desktop PC.

"Our product is targeted to the growing community of portable computer users, particularly those who use notebooks as their primary computing device," said Bud Oddsen, president of Innovative Office Products. "We are proud to have been recognized by such a highly-regarded judging group as that gathered by *Interior Design*."

About Innovative Office Products, Inc.

Innovative Office Products, Inc. is an Easton, Pa., manufacturer that designs and builds an industry-leading product line of mounting solutions for computer monitors and keyboards. Founded in 1986, the company produces innovative products and custom-designed solutions that serve the needs of such prominent customers as the New York Stock Exchange, IBM, Lockheed Martin and NASA. Among many design awards received by the company is the 2006 red dot design award, and a silver medal by Business Week magazine's Best Product Designs Of The Year for 2002.
